Instructions: FIMO leather-effect Terrazzo-style jewellery

1 Take 1 block of FIMO leather-effect in black and 1 in saffron yellow and roll them into 2-mm-thick sheets using the acrylic roller.

2 Cut lots of small scraps from the other two colours (saffron yellow and ivory) and place them in an irregular pattern on the black FIMO sheet. It creates a particularly beautiful effect when the colours overlap.

3 Now lay a piece of baking paper over the speckled FIMO leather-effect sheet, and roll over the baking paper applying gentle pressure with the acrylic roller until the colourful confetti pieces have fused into the black FIMO sheet.

Take the saffron yellow and the black-speckled FIMO sheets, gently lifting and stretching slightly with your fingers. This helps make the leather effect stand out even better.

Lay both sheets on baking paper – making sure they are completely even – and harden in the oven for 30 minutes at **130°C / 265°F** (top/bottom heat).

Then leave to cool.

Instructions: FIMO leather-effect Terrazzo-style jewellery

Now place the templates on the hardened sheets and trace around them with a wipe-away pen.

For the earrings, you need to cut out two of everything. Take the scissors and cut out the shape you traced onto the FIMO sheets.

Take the punch and punch out holes where marked.

Connect the various parts with jewellery rings, using the jewellery pliers as an aid.

Finally, glue the ear studs onto the back of the little FIMO circles using instant glue.

Simply thread the chain through the holes on the right and left sides of the FIMO semi-circle and your necklace is ready.
